SUMMARY

As a former businessman with a strong background in business education, I am embarking on an exciting journey to transition into the realm of data expertise. My goal is to leverage my diversified experience and extensive capabilities to craft robust and innovative solutions that address the evolving needs of the data industry.

I am a lifelong learner with a profound passion for numbers, and my commitment to continuous growth drives me to embrace new challenges and push the boundaries of technology. My hobbies include testing out Linux distributions and tinkering with single-board computers like the Raspberry Pi.

Having recently acquired the CompTIA A+ certification, my immediate plan is to study and acquire the following certifications listed in sequential order: Network+, Security+, Linux+, and CySA+. I am devoted to expanding my abilities and ensuring that I am well-prepared to tackle the challenges that lie ahead in a constantly evolving world.

SKILLS

AWS

SQL

Linux

Python

Computer Hardware

Computer Networking

Cybersecurity

Bash Scripting

Data Analysis
